

## Novus Barriers

### Product Info:

The Novus barrier's unique features include the ability to corner at 90 degrees, without any gaps, allowing the complete restriction of access to even the smallest of spaces.

Novus can be deployed with ease to surround, block off and enclose a pedestrian area or a site compound simply, effectively and when used with the additional mesh panels, securely.

Manufactured from UV resilient, high quality MDPE, each barrier is designed for a long working life. Each barrier weighs 25kg when empty, but a generous 180kg when water filled. Novus can also be sand filled where a longer time in situ is envisaged.

### Key Features:

- UV Stabilised MDPE
- Stackable for Easy Transportation
- Strong & Robust
- Customisable & Versatile
- Accessories Available:
  - Mesh Panel
  - Pedestrian Gate
  - Vehicle Gates
  - Reflective Strip
