

RB2000 Barriers

Product Info:

The RB2000™ system is a 1metre high, low level containment barrier suitable for highway and site delineation.

The patented 5 position interlocking system gives the RB2000™ versatility to flow around corners and bends. The system can be water filled for a ballast weight of 400kg, creating a solid, flat walled secure system.

The system comes with a range of fencing options: Mesh fence panels, hoarding panels, Pedestrian gates or vehicle gates alongside accessories including front stop, end stop and infills.

Key Features:

- UV Stabilised HDPE
- Heavy Duty Solution
- Patent 5 Position Interlocking System
- Simple installation
- Provides Safe & Secure Boundary
- Accessories Available:
 - Mesh and/or Hoarding Panels
 - Pedestrian & Vehicle Gate Systems
 - Front and End Stops
 - Infill Panels
