

## Fence Panels

### Product Info:

Our temporary steel fencing panels are designed to provide site security on a temporary basis.

Easy to use, mesh panels are available in either 2.85 metre or 3.5m widths with a height of 2 metres.

Panels are supported using the industry standard 'rubber' foot, with the option of additional panel supporting bracing arms. Panels can be coupled together with fence coupler clips.

Fencing panels can also be used with the Oaklands Rota Slot system for a more professional, streamlined on site finish. A range of ballast or support blocks are also available.

### Key Features:

- Compatible with Industry Standard Ballast Foot
- Available in Two Lengths
- Optional Ballast or Support Blocks Available
- Panels can be Coupled Together for Added Stability and Security
- Optional Gates Available

### Specifications:
