

Temporary Barriers

Product Info:

A simple, yet effective crowd control or general pedestrian control barrier. Ideal for indoor or outdoor events, siteworks or public areas.

Manufactured from high quality steel, the Oaklands 2.3 metre pedestrian barrier has a galvanised finish and link together with a lock in pin, which is also compatible with other popular temporary pedestrian barriers on the market.

Complete with standard or rounded safety feet to prevent a trip hazard, the Oaklands pedestrian barrier is an attractive and practical choice, taking up minimum walkway space, whilst at the same time making its safe and visible presence known to pedestrians and workers onsite.

Key Features:

- Galvanised Finish as Standard
- Powder Coating Options Available
- Sturdy Steel Construction
- Compatible With Other Market Options
- Perfect for Event Use
- Compatible with Rota Block Mini Ballast System
- Gate Options Available
